

INSPIRATION

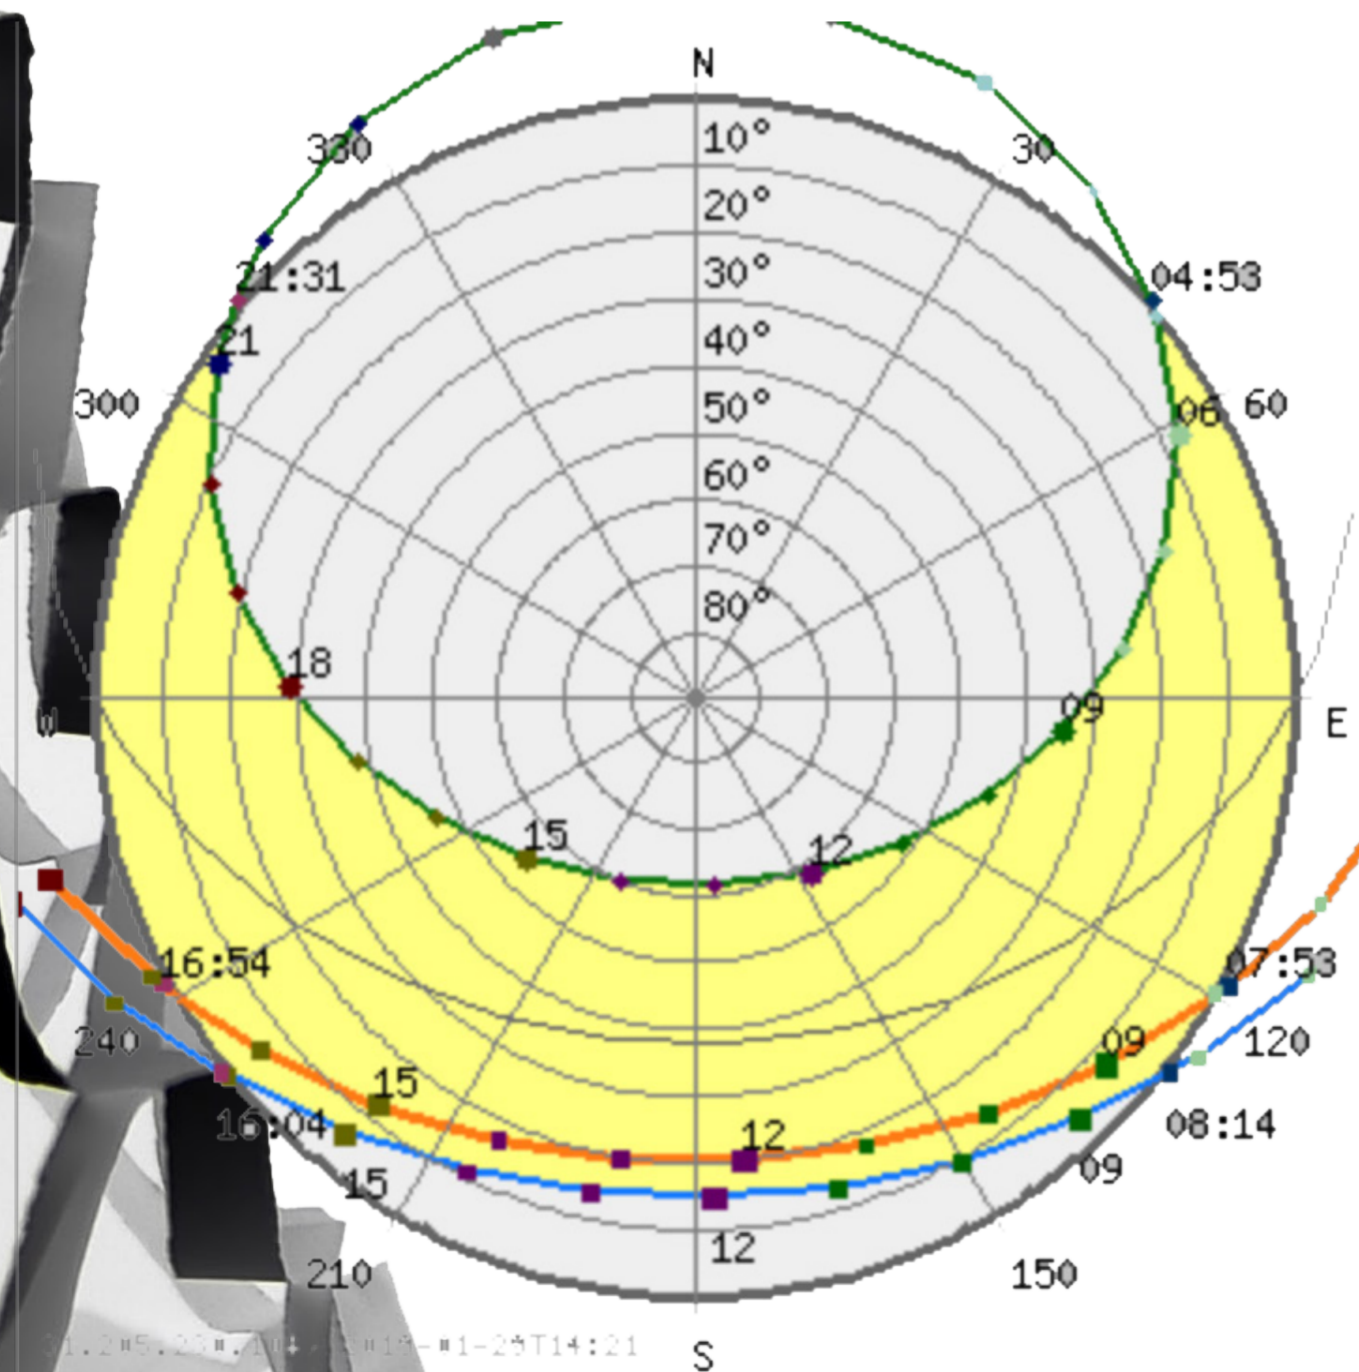

THE TOWER AT TEMPLE CHURCH

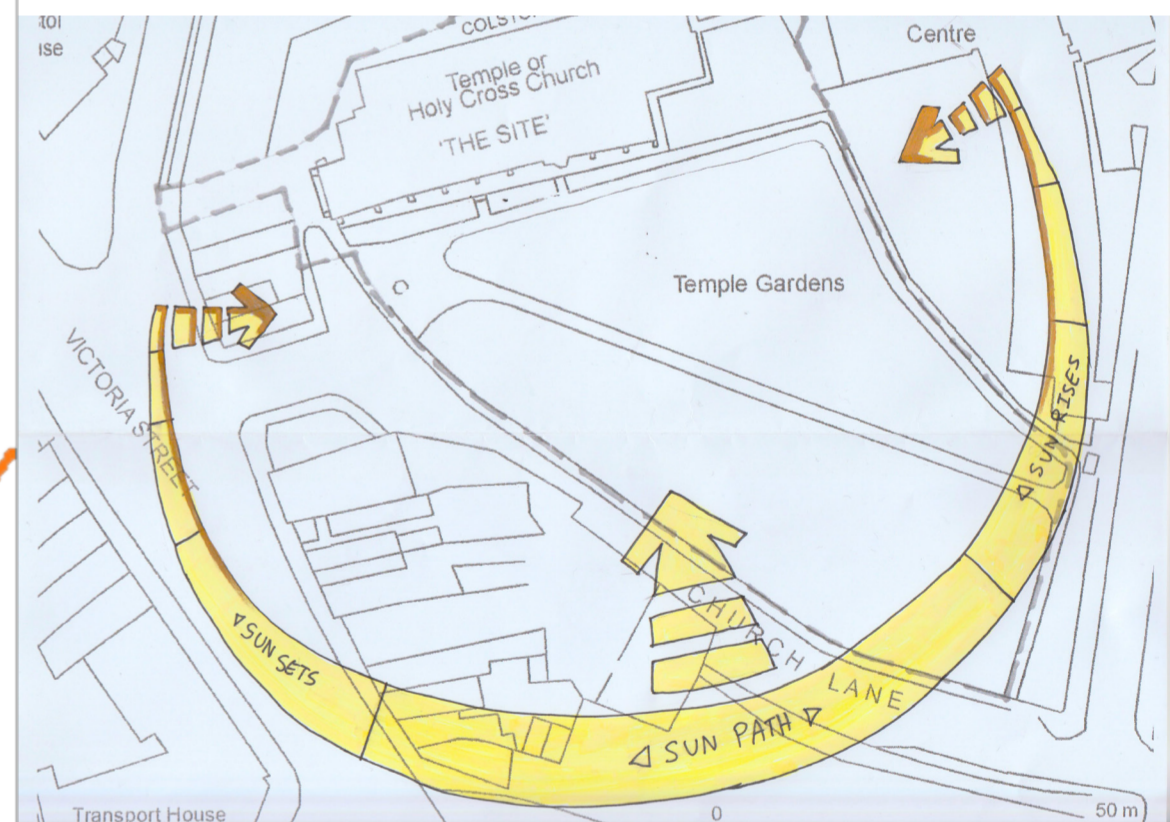

THAI LANTERN

The inside of the tower remind me of the Thai lantern called "Kratong puang tow lung". I got the modular form from the individual shape of the lantern, and I looked at the sunpath as the lantern create a really nice shadows.

BAR DESIGN

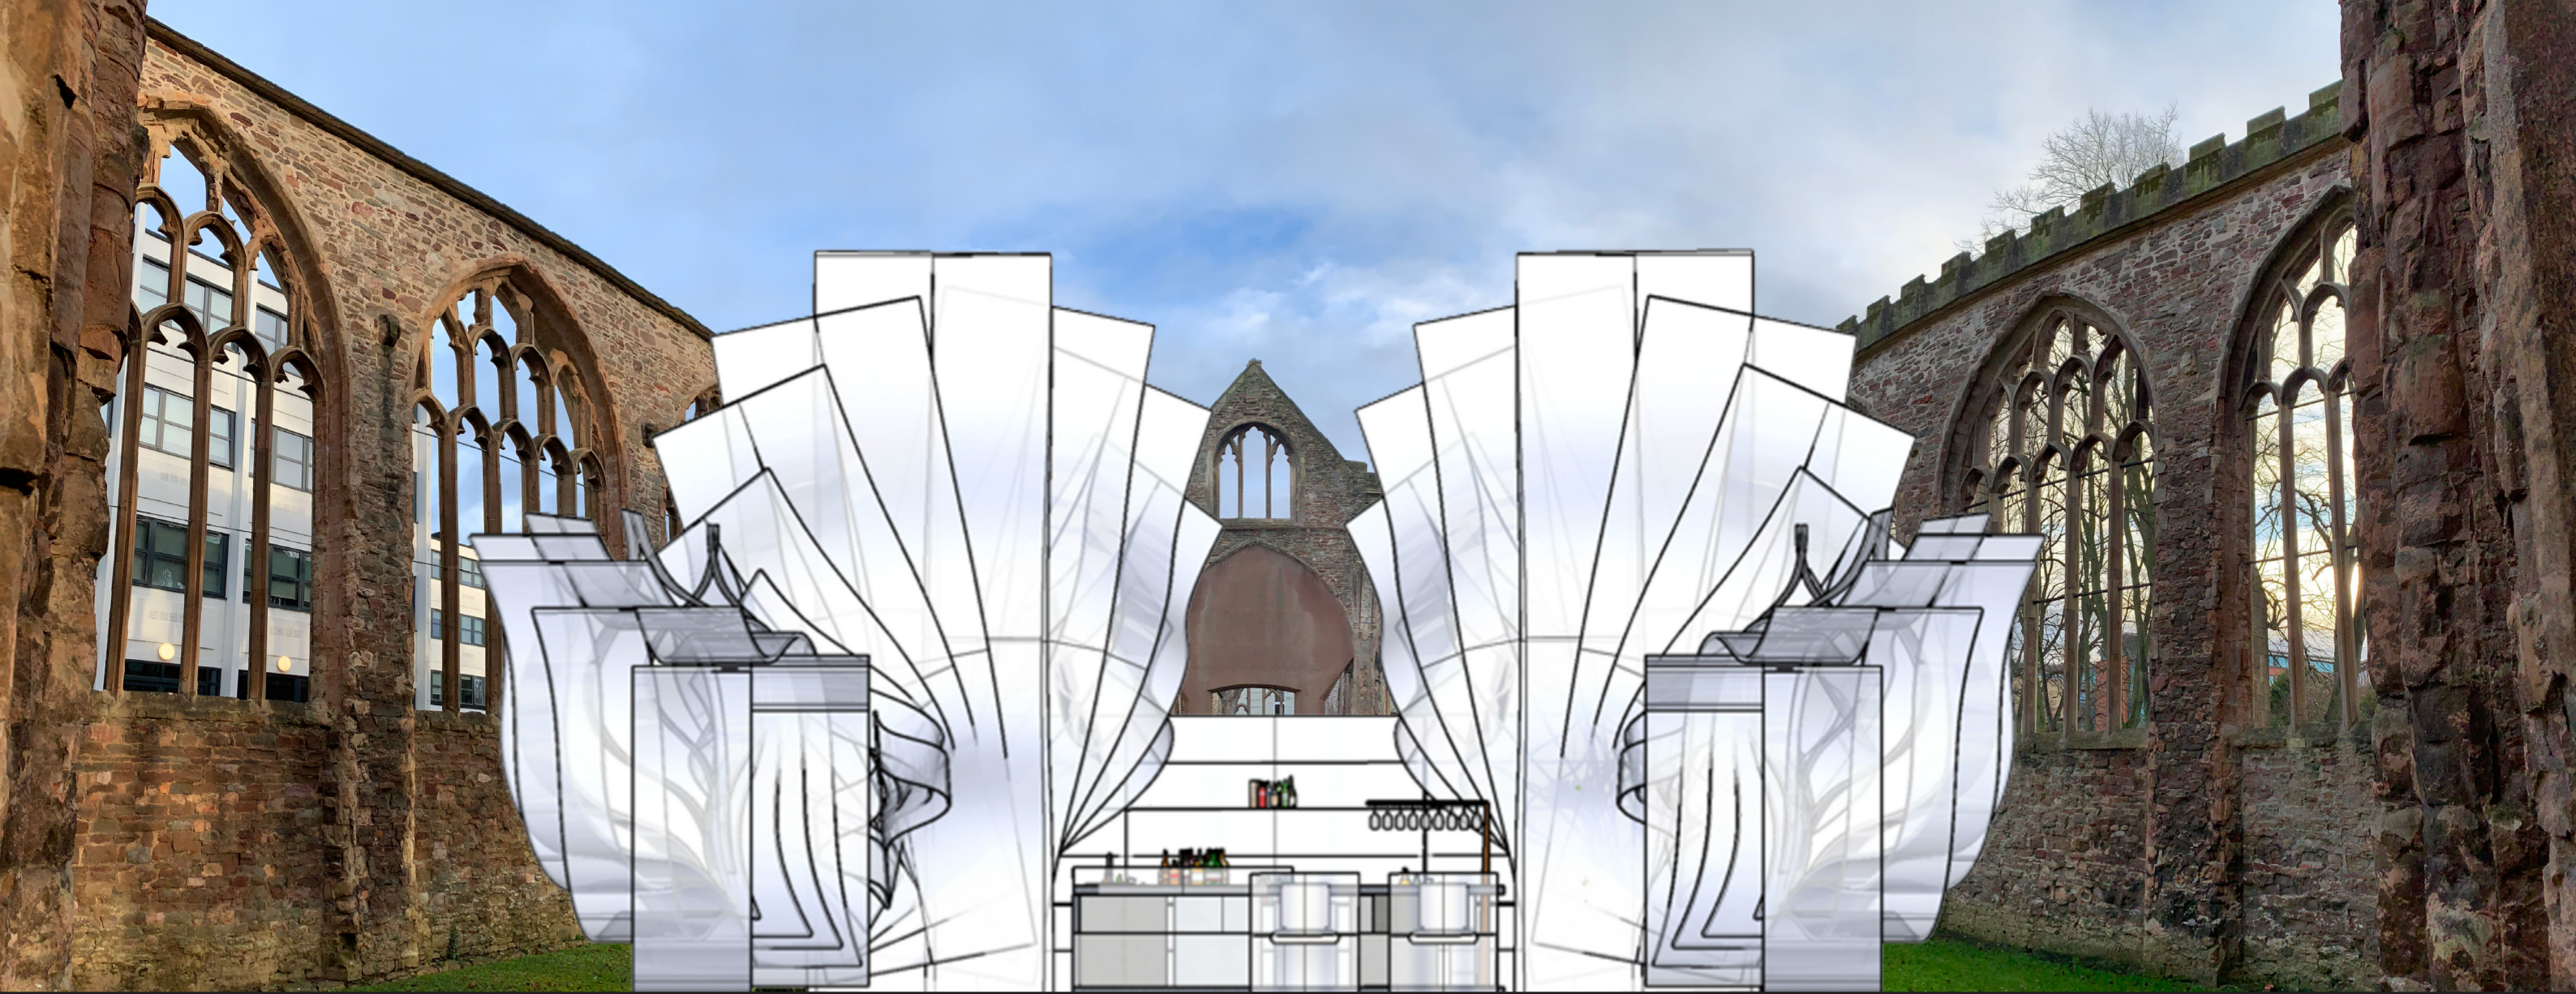

PLAN

FRONT ELEVATION

My main bar uses the same curve from the modular form to form a new design, and for the back bar I just use the modular form and duplicate it 9 times to create the design
